Instructions For Completing Form 8130-9

This form should be submitted to the Director under the following circumstances:

1. By the applicant for a type certificate or supplemental type certificate at the time he presents an aircraft or components thereof to the Director for tests.
2. By the applicant for a type certificate or supplemental type certificate for each engine or propeller submitted for type certification.

This form should be completed as follows:

Section I Aircraft: Complete the pertinent part of this section when certification covers an aircraft or component thereof.

Section II Engine: Complete this section when certification covers an engine.

Section III Propeller: Complete this section when certification covers a propeller.

Section IV Certification:

Item A. Check this block when an aircraft or component thereof is presented for flight or ground tests during type certification or supplemental type certification.

Item B. Check this block when an engine or propeller is presented for type certification.

The certification should be signed by an authorised person who holds a responsible position in the organisation.
