

# NZ Air Navigation Register

## Aeronautical Ground Lights

Updated 01 July 2010

- All co-ordinates are WGS-84 datum and are in degrees, minutes and seconds format. A chart for conversion from WGS-84 to 1949 datum (used on topographical charts) is available on the NZ Air Navigation Register (NZANR) Airspace Web page.
- **Red** text indicates the description is effective temporarily, or is being cancelled.
- **Green** text indicates a new description.
- **Highlighted** text indicates the description has had recent amendments.
- Date time groups (10 digit numbers) are UTC values.
- Superseded and cancelled NZANR descriptions remain until deleted on the NZANR archive date, which is the next aeronautical chart issue.
- Lights have been allocated numbers purely for reference purposes.
- ABN = Aerodrome Beacon, HBN = Hazard Beacon
- Every effort has been made to ensure the data published in this register is accurate. Inconsistencies and errors should be reported to the CAA for resolution and correction.

Nr	Name	Type	Characteristics	Hr	Candela	Co-ordinate, Effective date
