Audience

This course is intended for:
- Chief Executives
- Safety Systems Managers
- Other staff involved with implementing and utilising SMS

All attendees will gain a practical understanding of the systems and processes that their organisation should be implementing.
2 Day Practical SMS Course

An effective Safety Management System (SMS) can improve your organisation's performance, while ineffective systems only add another layer of compliance paperwork.

This course guides attendees through each of the SMS elements to demonstrate how an effective SMS can work in practice.

You will gain the knowledge and understanding to implement effective systems within your own organisation.

Course Content

Practical examples and case studies are used to understand and apply:
- Safety Policies
- Emergency Planning
- Hazard Identification
- Risk Assessment
- Root Cause Analysis
- Safety Goals and Objectives
- Safety Culture
- Change Management
- Managing Third Parties
- SMS training plans

Dates and Locations

See our website or email us for the date and location of our next course. We can also deliver in-house courses tailored to your specific requirements.

About us

Aviation Safety Management Systems Ltd is a Part 141 certificated aviation training organisation.

We have implemented SMS for multiple Group 1 organisations, from simple to complex systems.

Your trainer is an experienced safety management systems auditor for ACC, and facilitates monthly SMS meetings for an operator, involving all safety-sensitive third party contractors.
