# Systems for Continual Improvement Course

*To educate, to lead, to inspire...*

## OVERVIEW

*Are you ready to join the journey to becoming a world class organisation?* Most organisations improve as a reaction to feedback or in increments driven by a particular project. What if you could improve continuously, across the board, by being innovative and proactive? Critically, what if you could change before your competitor does?

This course is designed to give the most current ideas, skills, and the necessary tools to take away and implement in your organisation. For any organisation to be successful and to continually improve, the commitment of management and all personnel is vital.

Designed for all levels of the organisation, this course discusses practical methods to build both engagement and commitment for a proactive workforce. It covers topics that help identify opportunities for improvement beyond those typically used in business, how to bring about innovative thinking in the workplace, how to capture the vital knowledge within the organisation in line with ISO9001, and increase your focus on sustainability helping to increase the public perception of the organisation.

*“Southpac enjoys an enviable reputation with industry professionals from all over the world”*

### Who Should Attend?

**Managers, Team Leaders & Supervisors** working in an operational or administrative environment.

**Safety, Quality & Compliance Managers** in an operational or administrative environment.

**Lead & Internal Auditors** looking to further develop their knowledge of effective systems management and continual improvement.
