# Safety Investigators Course

*To educate, to lead, to inspire...*

## OVERVIEW

Safety investigations are a key activity of any Safety Assurance program. Safety occurrences and incidents when properly investigated and analysed have the potential to facilitate proactive safety improvements within an organisation. These learning opportunities may be used to prevent the occurrence of more serious incidents and accidents.

*“Southpac enjoys an enviable reputation with industry professionals from all over the world”*

This safety investigators course has been especially designed for those involved with the investigation and analysis of safety occurrences including incidents and near misses. This includes management at all levels and safety assurance personnel. Participants will develop the practical skills needed to investigate and analyse operational incidents with a view to developing safety improvements within their organisation.

For more complex aircraft accident investigations, ask about our Aircraft Accident Investigation Course.

### Who Should Attend?

- Safety Managers
- Safety Assurance Officers
- Safety Investigators
- WHS Officers
- Any involved in or supporting an investigation program

This course is applicable to participants working in corporate, flight operations, maintenance or ground operations.
