Safety & Lead Auditor Course

To educate, to lead, to inspire...

OVERVIEW

This Internationally recognised 5-day training course has been specially designed for those directly involved with the maintenance, monitoring and improvement of a Safety and/or Quality Management System. This includes management at all levels. A vital feature of this aviation quality and lead auditor training course is the application of the ISO 9001:2015 Quality Management System requirements as they are the foundation for Management Systems Worldwide. The interpersonal skills and qualities required to lead an effective audit team are instilled throughout and applied through various workshops and the practical on-site audit.

Why Choose Southpac?

Southpac has the reputation for conducting the most practical and up to date aviation auditor training and ISO 9001 courses in the industry.

Southpac have been involved with Quality and Safety Management Systems and their application within the aerospace industry for over twenty years. We have the experience, resources and capability to address the many unique and diverse elements of management systems and auditing in the aviation industry.

“Southpac enjoys an enviable reputation with industry professionals from all over the world”

This course is certified and internationally recognised. Upon successful completion of the course and all required assessments participants will receive an Exemplar Global certificate (Formerly RABQSA) and half of the units required to achieve the **Diploma of Quality Auditing**. See the Southpac course program for further details.
